

Make Your Job Less Work. Two Solutions for Office Eyestrain.

We make it visible.

Zeiss Makes Easy Work of Eyestrain.

Work is hard enough without additional strain on your eyes. Yet, the configuration of your office environment makes it the very place where you're most likely to suffer from eyestrain. It's tough on your eyes to constantly shift focus between your desk and your computer screen, and your computer and wider surroundings. Your eyes need help to see clearly, naturally, and comfortably all day, every day.

Zeiss proudly offers the solution to office eyestrain in two premium lenses designed specifically for office work. Choose the lens that's right for you and enjoy freedom from eyestrain with the help of one powerful pair of glasses.

Gradal RD—Versatility in the office.

Zeiss developed RD technology to give you perfect vision from your desk to your office door. Zeiss RD has a wide range of vision that will help you see clearly up to 10 feet away, so you'll be able to greet visitors, make phone calls, read reports, and check your email.

Zeiss Business Lenses—Clarity and comfort at the computer.

If you spend most of your day at a workstation, these lenses are designed for you. With perfect vision from 14 inches to 4 feet, you'll be able to see your computer, keyboard, monitor, and immediate surroundings with unprecedented ease. Zeiss Business also has an extra wide range of vision that makes them perfect for intricate hobbies and other tasks.

**Gradal RD and Zeiss Business are not suitable for use while driving.*
